SKB type aluminum overpass bridge

Manufacturer/Responsible Person: ALTEC GmbH, Rudolf-Diesel-Straße 7, 78224 Singen, Deutschland

E-Mail: info@altec.de

Please note the technical data of the products!

Article Numbers: 97813, 97812, 97811, 97810, 97809

Safety Instructions:

- Do not exceed the maximum load of 4000 kg.
- Installation should only be carried out by qualified personnel in order to avoid accidents and operating errors.
- Fasten the guides and rails correctly in accordance with the assembly instructions to prevent them from breaking off or tipping over. Ensure that the drive-over bridge is properly welded to the on-site U-profile.
- Regular inspection for damage and wear is required. Do not use if damage is detected.
- Check that the driving surface is non-slip before entering the bridge. Avoid slipping on the driving surface, as although it is non-slip, it can become slippery in certain conditions. Ensure that the riding surface is clean and dry before use to avoid the risk of slipping.
- Keep small parts that may fall off during transport or assembly in a safe place to prevent children from choking.
- Only use the product on stable substrates.
- Suitable for the intended use - do not allow any other use.
- Wear suitable protective equipment when installing and using the drive-over bridge.
- Follow the installation instructions supplied carefully. Observe the notes on safe use and maintenance in the installation instructions.
- There is a risk of injury and falling if used incorrectly.
