## Stacking tipper BSK 55, for traverse discharge

Please note the technical data of the products!

**Article Numbers:** 73502, 73499, 73498, 73497, 72705, 72701

### Safety Instructions:

- Design and manufacture the product in accordance with the safety requirements.
- Be careful when stacking; observe maximised stackability: no more than 3 units on top of each other.
- For heavy contents, observe the maximum load capacity of 1000 kg; do not exceed this.
- Observe correct handling and all safety measures to avoid injury.
- If the product is damaged, discontinue use and inform the manufacturer.
- Take care when handling heavy loads; risk of injury when lifting and transporting.
- Wear protective equipment, especially during assembly and use.
- Take particular care on uneven or slippery surfaces.
- Only use the product for its intended purpose; do not use in the children's area.
- Check load capacity of 1000 kg to avoid overloading.
- Position the support legs correctly to ensure stability when stacking.
- Do not use near flames or heat sources.
- Carry out regular maintenance to ensure safe functionality.
- Handle sharp edges with care to avoid injury.
- Read the operating instructions before use.
- Be aware of the risk of serious injury from improper lifting or stacking.
- Do not use in water or wet environments without protection against corrosion.
- For commercial use; use only by trained personnel.
