## Stacking tipper BSK 200, for traverse discharge

Please note the technical data of the products!

**Article Numbers:** 73534, 73533, 73532, 73531, 73530, 73529

### Safety Instructions:

- Carry out a safety check before use and check for visible damage.
- Do not overload the product and do not exceed the maximum load capacity of 2000 kg.
- Only use on firm, level surfaces to prevent tipping over.
- Do not use near children without supervision; the product is not suitable for children.
- Wear suitable protective clothing, such as gloves and sturdy shoes, to avoid injury.
- Store securely to prevent accidents caused by tipping over.
- The stacking tipper is only intended for use with suitable support legs, the correct arrangement of which must be ensured.
- Caution when handling: Sharp-edged parts can cause injuries.
- Safety instructions for correct stacking: can be stacked a maximum of 3 high.
- Take particular care when working near edges or unsecured slopes.
- Regularly check the condition of the tipper and stabilisers for wear or damage.
- Risk of crushing or injury due to improper use or handling of the product.
- Ensure compliance with safety requirements in accordance with EU regulations.
- Caution: High load capacity of 2000 kg, proper handling required.
- Serious injuries due to improper handling due to the heavy weight (170 kg or 187 kg)
