Safety Instructions:

- Make sure that the desk and mobile pedestal are stable and that the surface is level to prevent tipping over.
- The drawers should not be overloaded to avoid blockages and damage and to ensure functionality.
- Follow the assembly instructions carefully to avoid safety risks and assembly errors during installation.
- The central locking system and rotary cylinder lock of the roller container should be functional to prevent unauthorised access.
- Avoid direct sunlight and moisture on the furniture to prevent discolouration and material damage to the surfaces.
- Watch out for sharp edges and corners to prevent the risk of injury. Regular checks for stability and safety are necessary.
- Furniture should be checked regularly for stability and safety, especially table corners and sharp edges.
- The load capacity of the desk and mobile pedestal must not be exceeded in order to avoid damage and injury.
- Use by children should be supervised to avoid misuse or injury.
- Safety instructions regarding self-assembly should be provided in a comprehensive and comprehensible manner in order to avoid assembly errors.
