Safety Instructions:

- Mount the product on the wall and secure it with suitable fastening elements to avoid the risk of tipping.
- Observe maximum load per shelf: 25 kg. Do not overload to avoid structural damage.
- The cabinet should be installed in dry areas to prevent rust formation.
- Use a security cylinder lock to prevent unauthorised access.
- Keep the cabinet away from heat sources to avoid the risk of fire.
- Sharp edges can cause injuries. Be careful when handling.
- Do not open the door more than 108 degrees to avoid damage.
- Regular inspection of the cabinet fixings recommended to ensure safety.
- The lock may fail if used improperly.
- Not suitable for use by children without supervision.
- Rubber buffers reduce noise, but should be checked regularly for wear.
- Chemical and hazardous materials should be stored in accordance with regulations.
- Use suitable cleaning agents for cleaning to avoid damage.
