Safety Instructions:

- Caution: Sharp edges or corners can cause injuries. The use of protective equipment is recommended for sharp edges.
- Carefully follow the instructions for assembly and installation to avoid uncertainties and damage due to improper use.
- The product may only be used for its intended purpose and under consideration of the maximum load in order to avoid injury or damage.
- The product is not intended for use by children and must not be used without adult supervision.
- Before first use, ensure that the shelf is stable and correctly mounted on a level, stable surface to prevent it from tipping over and being overloaded.
- Observe the safety instructions to avoid injuries due to improper use.
- Regular inspection of the stability and safety of the shelving is recommended.
- Ensure that the shelf is correctly installed and that the maximum load per shelf is not exceeded in order to avoid overloading.
- Avoid sharp or heavy objects that could damage the powder coating.
- Suitable tools must be used for installation.
