Safety Instructions:

- Ensure that the workbench is stable and mounted on a stable surface to prevent tipping or slipping and follow the assembly instructions carefully.
- The maximum load of the workbench of 1,250 kg and the load capacity of the drawers of 100 kg must not be exceeded in order to avoid structural damage or tipping.
- Use suitable protective equipment, especially gloves, to avoid injury.
- Keep small parts (such as screws) out of the reach of children to prevent the risk of suffocation.
- Avoid placing heavy objects on the drawers, do not overload drawers and do not stand on them to avoid damage and the risk of falling.
- Take care when lifting heavy loads; use safe techniques to avoid back pain and injury.
- To prevent structural damage, do not use the workbench as a jumping box or impact surface for heavy tools.
- Keep the workplace clean, free of obstacles and well lit to prevent falls and accidents.
- Close the drawers completely before using the workbench to avoid injury.
- Avoid excessive moisture and extreme temperature fluctuations to protect the workbench.
- Instruct all operators in the safe use of the workbench.
- Contact the manufacturer or dealer in the event of changes to the design or wear and tear.
- Ensure that children are kept away from the workbench.
- Attach safety instructions, include product safety instructions in understandable language to avoid injuries.
- Use anti-slip studs and secure handles against slipping to prevent accidents.
