Safety Instructions:

- Caution: Sharp-edged parts, risk of injury during assembly.
- Check the maximum surface load of 1,250 kg and ensure that this is not exceeded in order to avoid structural damage or injury.
- Drawers have a load capacity of 100 kg, suspended drawer max. 50 kg, do not overload.
- Set up the workbench on a stable, level surface, avoid tipping over.
- Follow the recommended instructions for use to avoid damage and hazards.
- Protect from improper use to avoid the risk of electric shock from electrical components.
- Protection against the risk of crushing and injury during use, especially when closing doors and drawers.
- Do not pull out drawers completely to prevent them from tipping over.
- Keep small parts out of the reach of children to avoid the risk of choking.
- Provide product instructions and safety information in understandable language.
- Do not overload the drawers; avoid breaking or warping.
- Store heavy objects safely and properly to minimise the risk of injury.
- Use suitable personal protective equipment (e.g. gloves, safety goggles).
- Keep the work surface clean and free of obstacles, avoid the risk of falling.
- Use of the central locking system to secure the drawers and doors is recommended.
- Not suitable for children - risk of injury due to improper use.
- Do not use the drawers as a step or ladder.
- Supplied fully assembled, check for stability before setting up.
- Observe warnings regarding material components such as steel and wood.
- Do not remove the anti-slip studs on the feet for safe use.
