Article Numbers: 155156, 155155, 155154, 155153

Safety Instructions:

- Make sure that the computer cabinet is securely positioned and stable to prevent it from tipping over, especially if it is mobile.
- Only use the cabinet in the intended manner to avoid mechanical damage or injury.
- Keep the cabinet away from heat sources to minimise the risk of fire.
- Secure the monitor housing properly to prevent data loss or damage to the screen.
- Use the cable outlets properly to avoid overheating or damage to the cables. Ensure that all cables are routed properly to avoid tripping hazards.
- Ensure that the inside of the cabinet is well ventilated and that the ventilation of the monitor housing is not blocked to prevent overheating.
- Take into account the 20 kg load capacity of the pull-out shelf and avoid overloading it to prevent breakage or injury.
- Use suitable furniture castors when the cabinet is used as a mobile unit to ensure safe movement and to secure the product properly on castors to avoid the risk of tipping.
- Keep the cabinet away from direct sunlight to prevent damage to materials.
- Ensure that all moving parts are correctly secured to avoid injury.
- Ensure that all electrical components are installed in accordance with the applicable safety standards.
- Only use screens up to max. 26" in the lockable monitor housing.
- Make sure that the device is only used for the intended applications.
