

# Product Safety Information

## System superstructures

**Manufacturer/Responsible Person:** RAU GmbH, Im Rohrbach 14 + 16, 72336 Balingen-Frommern, Deutschland

**E-Mail:** info@rau-gmbh.de

Please note the technical data of the products!

**Article Numbers:** 155097, 155096, 155095, 155094, 155093

## Safety Instructions:

- Assemble carefully by screwing to the worktop to prevent slipping or tipping over. Ensure a secure, stable design during assembly. This should only be carried out on stable and level surfaces.
- When working on the construction, ensure that no fingers or body parts can become trapped between moving parts.
- Do not exceed the maximum load of the shelves and metal shelves to avoid the risk of breakage or tipping over. Do not overload the metal shelf; observe the maximum permissible load.
- Assemble all components correctly and tighten screw connections firmly to ensure stability and safety. Ensure that the product is correctly assembled and screwed in place.
- Use personal protective equipment such as gloves and safety goggles during installation. Use suitable tools to avoid injuries.
- Keep children and pets away during assembly and use. Keep small parts and tools out of their reach. Smaller parts can fall off and pose a choking hazard.
- Keep the work surface free of obstacles and ensure there is sufficient space to avoid accidents and tripping hazards.
- Regularly check the stability of the system supports and the metal shelf to prevent them from falling over. Mount the system supports at the correct distance to prevent wobbling.
- When adjusting the shelf, ensure that there is no risk of injury from sharp edges. The materials used may have sharp edges; take care when handling all metal parts.
- Read and understand the assembly instructions and ensure maximum load and stability during use. Improper use can result in injuries due to falling objects.
