Safety Instructions:

- Choking hazard due to small parts that can be swallowed or loose drawer contents.
- The use of heavy materials and improper handling can cause injury.
- Do not overload drawers and observe the maximum load capacity to avoid injuries from falling out (max. load capacity 100 kg).
- Sharp edges and corners of the workbench can cause cuts.
- Follow the safety instructions for assembly and use of the workbench to avoid accidents and loss of performance.
- Workbench may tip or fall over if handled incorrectly.
- Ensure maximum load capacity of the workbench (1,000 kg for substructure containers).
- The workbench should only be used by adults and should not be accessible to children to avoid injury.
- Handle hinges and moving parts with care to avoid crushing.
- Read the instructions carefully before assembly or installation.
- Use the integrated central locking system to ensure the drawers are secure.
- Before using the workbench, check the stability and condition of the components for possible damage.
