Safety Instructions:

- Please ensure that the product is used under the maximum load capacity of 250 kg to avoid injury.
- Ensure that the brakes on the castors are activated during use to prevent unintentional rolling away.
- It is recommended that a safe load distribution is always ensured when using the rolling frame.
- The product is not suitable for use by children; bear this in mind when transporting and storing the rolling frame.
- Only use the product for its intended purpose and in accordance with the instructions to minimise safety risks.
