Safety Instructions:

- Maximum load per drawer base: 25 kg. Take care not to overload.
- Drawer made of galvanised sheet steel. Avoid sharp edges during installation.
- Ensure that the drawer is correctly inserted in the material cabinet to prevent it from slipping or falling out.
- Keep the drawer away from liquids and chemicals to prevent corrosion.
- The drawer is only suitable for use with the MS series material cupboards with centre partition.
- Do not handle sharp objects in the drawer to avoid damage.
- Risk of injury from falling objects if handled incorrectly.
- Be careful when closing the drawer to avoid trapping fingers.
- Not suitable for children as the drawer was designed for adults.
