

Product Safety Information

Load hook LH 2, for fork lift truck, 2500 kg load capacity

Please note the technical data of the products!

Article Numbers: 76094, 76093

Safety Instructions:

- Risk of suffocation due to improper handling of the load hook.
- Risk of injury due to incorrect use or overloading of the product. The weight limit (2500 kg) must not be exceeded; only use with the specified load capacity of 2500 kg. The product must not be overloaded.
- Wear safety goggles and suitable protective gloves when handling the load hook.
- The load hook should only be used by trained and authorised persons. Use of the product by children or unauthorised persons is prohibited.
- Ensure that the connecting elements of the load hook are properly fastened to prevent slipping.
- The load hook should be checked regularly for wear and damage.
- Ensure that the load hook is used for the intended loads and the correct fork cross-section.
