

Product Safety Information

Hazardous material roller shutter cabinet, type RSG-1

Please note the technical data of the products!

Article Numbers: 133925, 133924, 133923, 133922, 133921

Safety Instructions:

- Observe the maximum storage of 2 x 200 litre drums, do not load more than 400 litres. Ensure that the maximum load of 200 litres per drum is not exceeded.
- Ensure protection against unauthorised access by locking the cylinder lock properly and securely.
- Suitable for indoor and outdoor use; for outdoor storage, pay attention to weather-related influences, do not use in extreme weather conditions.
- Avoid overfilling the drip tray to prevent environmental damage. Remember that overfilling the 224 litre collection tray can be dangerous.
- Wear protective clothing (gloves, goggles) when handling the product and use PPE when handling hazardous substances.
- In the event of damage, notify the manufacturer immediately and take appropriate measures. Check the cabinet regularly for cracks, leaks, corrosion or rust.
- Ensure that the roller shutter cabinet is placed on a stable, horizontal surface to prevent it from tipping over.
- Ensure that hazardous substances are stored in accordance with the applicable legal regulations. Inform about local storage regulations.
- Install the cabinet in well-ventilated areas to avoid the accumulation of harmful vapours.
- Allow access only to authorised persons with appropriate safety instructions.
- Do not store hazardous substances in the vicinity of ignition sources.
- Only use the roller shutter cabinet for the intended storage of hazardous substances that are compatible with the material used.
- Product is heavy (162 kg); observe necessary safety precautions when moving.
