

Product Safety Information

Sump tray, type AW60-1 SRF, mobile

Please note the technical data of the products!

Article Numbers: 133991, 133990, 133989, 133988, 133987, 133986

Safety Instructions:

- This product is intended for the storage of chemicals. Protect yourself from hazardous vapours and wear suitable personal protective equipment, especially when handling hazardous liquids.
- The product is not suitable for the transport of hazardous substances and should therefore be used in accordance with the relevant regulations.
- Ensure that the product is not overloaded with a maximum load capacity of 1000 kg/sqm to avoid structural damage.
- Please ensure that the collection volume of 61 litres is not exceeded in order to avoid overflow.
- The ground clearance is 125 mm, so be careful on uneven surfaces.
- Castors and the tray should only be used on firm, level surfaces to avoid tipping over.
- Ensure that the tray is stable and positioned on a level surface to prevent it from tipping over.
- The use of swivel castors requires special care to avoid tipping over.
- Risk of suffocation due to improper use, in particular due to overloading.
- Do not use the drip tray near sources of ignition or in areas with high temperatures.
- Children and untrained persons should not be allowed near the drip tray to avoid injury.
- Before filling, ensure that the drip tray is not damaged and check for leaks to prevent environmental damage.
- Check the tray regularly for damage and rust to ensure its integrity and safe use.
- If used improperly, the product can cause damage that may result in the leakage of hazardous liquids.
