

Product Safety Information

Suspension trays for pallet rack type EHW 2700

Please note the technical data of the products!

Article Numbers: 134123, 134122, 134121, 134120, 134119, 134118

Safety Instructions:

- Only use the product in the intended area of application and only by trained personnel to avoid injury.
- Improper use or incorrect handling can damage the product or cause it to fall over.
- Ensure that the maximum load capacity of 100 kg/sqm is not exceeded. Users should be familiar with the load capacity limits and safety instructions.
- Before use, ensure that the handle weight of 100 kg/sqm is not exceeded in order to avoid structural damage.
- It may only be used within the defined specifications for the collection volumes of 200 litres, which are only suitable for liquid substances.
- Install the product correctly, taking into account the load-bearing capacity and stability, and take suitable protective measures against the effects of the weather.
- Keep the product out of the reach of children and protect it from direct sunlight and extreme weather conditions.
- Avoid standing under loaded shelf beams and only fit hanging trays on compatible shelving systems to prevent them from tipping over or slipping.
- In the event of damage or signs of wear, remove the product from circulation and contact the manufacturer.
- Carry out regular inspection and maintenance of the suspension trays and inform users about the safety measures.
- Wear suitable personal protective equipment, especially during assembly. Wear protective clothing in case of contact with hazardous materials.
- Ensure that safety instructions for handling, maintenance and correct installation are clearly provided.
