

Product Safety Information

Basic rack, 4 shelves, galvanised

Please note the technical data of the products!

Article Numbers: 31139, 31138, 31137, 31136, 31135

Safety Instructions:

- Observe maximum load per shelf with evenly distributed load: up to D 600 mm = 100 kg, for D 800 mm = 200 kg.
- Ensure that the shelf is properly assembled and stabilised, check for possible damage before use and regularly check the stability, especially under high loads.
- Only use the shelf for its intended purpose, not as a ladder, and ensure that it is protected from children's hands to avoid the risk of falling and injury.
- Set up and install the shelf on a level, stable surface to prevent it from tipping over.
- If additional loads are used, check the stability of the shelving regularly.
- Use cap guards to prevent injuries.
- Read and follow the product instructions on the packaging and observe the handling instructions.
