

Product Safety Information

boltless shelving system R 3000, add-on bay, W 1345 mm, 4 shelves galvanised

Please note the technical data of the products!

Article Numbers: 31144, 31143, 31142, 31141, 31140

Safety Instructions:

- The structure of the shelf must be stable and mounted on a level surface to prevent it from tipping over.
- Maximum load capacity per shelf: up to D 600 mm = 100 kg, up to D 800 mm = 200 kg; do not exceed this.
- Do not load the shelf beyond the maximum permissible load to avoid the risk of damage or injury.
- Wear suitable personal protective equipment when assembling or disassembling the shelving.
- Designed for commercial use, should therefore be used with caution in consumer environments.
- Ensure that the load is evenly distributed to avoid overloading.
- Improper use can result in serious injuries.
- The product is not intended for use by children.
- All safety instructions for installation, use and maintenance must be followed. Additional safety checks and measures are required for use in commercial environments.
- Use only for the intended purpose; do not attach any other loads or objects that could impair stability.
- Safety instructions in the respective national language must be enclosed.
