### Safety Instructions:

- Do not overload the cabinet and place it on a stable surface to avoid instability and tipping over.
- Keep children away from small parts and out of reach of children to avoid the risk of suffocation.
- During installation and use, carefully follow the manufacturer's instructions and product information and use suitable protective equipment.
- Do not place the product near heat sources or naked flames.
- Avoid improper handling to minimise the risk of injury from sharp edges.
- Do not use the cupboard as a seat.
- Store tools and parts safely after use to avoid accidents.
- Regularly check the stability of the height adjusters and levelling feet, observe the maximum load limits of the shelves to ensure safety.
- Install all parts of the roller shutter cabinet securely and do not play or climb on them to prevent falls.
