Safety Instructions:

- Before assembly, ensure that all parts and tools are present and securely connected to the instructions to prevent tipping or collapse.
- Do not exceed the maximum load of the shelves and fitted shelves in order to avoid overloading, risk of tipping over, bending or breaking.
- The cabinet should stand on a stable and level floor; adjust the integrated height adjusters or levelling feet correctly and check them regularly to ensure stability and stability.
- Avoid using the product in humid environments or near water sources; protects against water and mould formation.
- Keep small parts safe during assembly and transport to minimise the risk of swallowing and to prevent choking.
- Do not overload the cupboard and anchor it securely to the wall, especially in the case of tall models, to prevent it from tipping over.
- Keep children away from the product to avoid injury from climbing or falling over.
- Before assembling the product, read the assembly instructions carefully and follow the instructions for use.
- Regularly check the robust construction and adjustable feet of the cabinet for damage.
