Article Numbers: 192069, 192068, 192067, 192066

Safety Instructions:

- The cabinet and roller shutter cabinet may only be set up on a stable and level surface to prevent them from tipping over.
- When transporting the cabinet, a sufficient number of people must be deployed to prevent it from tipping over or falling.
- Keep the cabinet and roller shutter cabinet away from heat sources to prevent damage or deformation of the materials.
- The maximum permissible load on the shelves and racks must not be exceeded in order to prevent breakage or instability.
- Avoid overloading the furniture with heavy objects to prevent structural problems and deformation.
- Only use recommended cleaning agents to avoid damaging the surface.
- Make sure that the furniture parts are correctly assembled and firmly connected to ensure optimum stability and safety.
- Keep children away from the designated storage areas and moving parts to avoid injury or choking hazards.
- Do not use the roller shutter cabinet in damp or wet environments to prevent damage to the materials.
- Follow the assembly instructions carefully to ensure that all parts are assembled correctly.
- The use of sharp or heavy objects should be avoided to prevent damage to the cabinet or injury.
