Safety Instructions:

- Watch out for sharp edges or corners that could cause injury.
- The instructions for installation and use should be clear and easy to understand. Include clear instructions and safety information with the product as provided by the manufacturer.
- The product should stand securely to prevent it from tipping over, especially with heavy contents. Ensure that the product is standing on a level surface and is properly assembled.
- Adults should supervise the assembly and adjustment of the cabinet to minimise risks to children. Safety warning: Children must not have access to the roller shutter cabinet without supervision in order to avoid injury.
- The product is not intended for outdoor use. Ensure that the cabinet is protected from extreme weather conditions to prevent damage to the melamine resin material.
- Avoid contact with water splashes to prevent damage to the surface.
- Create a safe and ergonomic working environment to prevent accidents during assembly.
- Ensure that the product fulfils the requirements of the general safety requirement in accordance with Article 5.
- Maintain monitoring of the safety of the product even after it has been placed on the market by means of suitable procedures. Provide transparent and easy-to-understand recall notices in the event of safety risks.
- Consumers must be given the opportunity to submit complaints about the product.
- Safety note: The roller shutter cabinet may collapse or tip over if handled incorrectly.
- Use the product safely in accordance with the enclosed instructions. Use the cabinet in accordance with the intended instructions for use to avoid injury.
- Avoid overloading the cabinet to ensure stability.
- Observe the prescribed ventilation requirements, especially when using electrical or chemical appliances in the vicinity.
- Do not install the cabinet near heat sources or in direct sunlight.
