Safety Instructions:

- Ensure that the sliding doors are properly closed and functional to prevent injuries and jamming.
- Use the height-adjustable shelves according to the instructions for stability.
- Check the levelling feet regularly for stability and functionality to prevent the cabinet from tipping or wobbling.
- Use the push cylinder lock in accordance with the instructions to avoid malfunctions.
- Do not place any heavy objects on the doors to prevent damage or injury.
- The product should be installed and used safely and the installation instructions should be followed carefully.
- The product should be placed on a firm, stable surface to ensure safe use.
- Heavy objects should not be stored too high to prevent the cupboard from falling over.
- All small parts should be kept out of the reach of children to avoid the risk of choking.
- The product is not suitable for children under 3 years of age due to small parts.
- All sharp edges and corners should be covered to prevent injuries, especially in environments with children.
- The cabinet must not be overloaded to prevent it from tipping over.
- Children should be supervised when using the cabinet to avoid injury.
- Follow the manufacturer's instructions carefully during installation to avoid accidents during installation.
- Observe safe installation and use to avoid injury.
- Avoid overloading the doors to prevent damage or injury.
- Regularly check the structural integrity of the product.
- Follow disposal procedures according to local regulations.
- The cabinet should not be installed near heat sources or in direct sunlight to avoid material deformation.
- In the event of a defect or a stuck sliding door mechanism, the cabinet must not be used until the problem has been rectified.
- Only use the cabinet for its intended purpose.
