Article Numbers: 192227, 192226, 192225, 192224, 192223, 192222

Safety Instructions:

- Ensure that height-adjustable shelves are used correctly to avoid the risk of falling.
- Do not overload the cupboard and use the shelves in accordance with the specified maximum loads to ensure stability and safety.
- Regularly check the cupboard for damage, especially to the sliding doors, locks and edges of the melamine-coated chipboard, to prevent injury and functional failure.
- Ensure that the base is level and secure and adjust the levelling feet correctly (height of 23-33 mm) to prevent wobbling or tipping over.
- Children, infants and pets should be kept away to avoid injury.
- Avoid using the cabinet in environments with extreme temperatures or high humidity and protect it from direct sunlight, naked flames and hot surfaces to prevent material damage.
- Ensure that doors and drawers are opened and closed gently and carefully to avoid the risk of crushing.
- The push cylinder lock and other security components should be regularly maintained and checked for functional security measures.
- Keep the area around the cabinet free of obstacles to prevent falls.
- Read and follow the operating instructions carefully to assemble and use the cabinet safely, ensuring that stable parts are properly connected.
- Avoid overloading individual shelves with heavy, unevenly distributed weight to prevent damage.
- Keep the product away from heat sources and avoid damage caused by heat or fire.
