Safety Instructions:

- Use the product according to the instructions provided.
- Ensure that sliding doors function safely and properly to prevent tipping over in the event of improper handling.
- During assembly, ensure that all parts are installed correctly and that suitable protective measures are taken to avoid injury.
- Pay attention to the maximum load of the shelves and the height adjustment to prevent the risk of tipping and damage.
- Avoid sharp objects near the cabinet to prevent damage.
- The cabinet is made of melamine-coated chipboard (emission class E1). Avoid excessive heat or moisture to prevent damage.
- Ensure that the product is stable and cannot tip over by placing it on a stable and level surface and adjusting the levelling feet correctly.
- Beware of sharp edges or points on doors and carcasses to avoid injury.
- Observe the safety information in accordance with DIN 68765 and install and use the product in accordance with the instructions.
- In the event of safety problems, inform the market surveillance authorities in good time and take corrective measures.
- Ensure that the cabinet is properly locked when not in use to prevent unintentional opening.
- Children should be kept away from the cabinet and its contents and should not use the cabinet without supervision to avoid injury.
- Follow the assembly instructions carefully to avoid breakage and instability.
