Safety Instructions:

- Choking hazard due to small parts - Keep the product out of the reach of children.
- Take care when handling the sliding doors incorrectly to avoid crushing.
- Observe the recommended installation information to ensure safety.
- Check the product regularly for damage for safety reasons.
- Do not overload the cabinet, as this may impair stability.
- Guide sliding doors correctly in the track to avoid jamming.
- Back panel is glued - careful handling required to avoid breakage.
- Handle push cylinder lock securely; always close and lock properly.
- Check the stability of the cabinet to prevent it from tipping over.
- Avoid contact with water to prevent material damage.
- Keep the cabinet away from heat sources to avoid deformation.
- Cabinet is heavy - take care when transporting and setting up.
- Provide edge protection to avoid the risk of injury.
- Level out uneven floors - risk of tipping over.
- Only use as intended - misuse can lead to damage.
- Check hinges and locks regularly to ensure proper function.
- Adjust height-adjustable shelves to a stable position to avoid safety risks.
- Ensure that all parts are undamaged before installation.
- Close the sliding doors carefully to avoid crushing.
- Installation by specialised personnel recommended.
- Do not use harsh chemicals for cleaning.
