Article Numbers: 31095, 31094, 31093, 30356

Safety Instructions:

- Observe the maximum permissible load capacity of 85 kg and distribute the load evenly.
- Do not load the product beyond the specified load capacity in order to avoid a hazard due to structural weakness.
- Secure the shelves properly in the rack to avoid the risk of falling.
- Suitable for dry environments; avoid corrosion.
- Avoid improper use or overloading the shelves.
- Floor coverings and storage units should be placed on non-slip materials.
- Ensure that the shelves are stable and secure.
- Avoid risk of injury due to improper handling.
- Use only for the intended purpose.
- Only use additional shelves on stable surfaces.
