Safety Instructions:

- Ensure that the shelf is stable, the integrated height adjusters are correctly adjusted and all fastenings are regularly checked for loosening to prevent tipping.
- Keep the surrounding area clear to avoid tripping hazards.
- Avoid overloading the shelves and the maximum permissible load in accordance with the manufacturer's instructions to prevent breakage or deformation.
- Do not place the shelf near heat sources or in rooms with high humidity, and avoid using it in damp or wet environments.
- Regular cleaning of the shelves to avoid dust accumulation and possible slip hazards.
- Make sure that heavy objects are not stored too high to avoid the risk of falling.
- Check all parts regularly for possible wear or damage to ensure safety and stability.
- Follow the assembly instructions carefully and attach all parts according to the instructions to prevent tipping.
- Before use, ensure that all connections are firm and stable.
- Observe the instructions for safe installation in accordance with the enclosed instructions.
- Take care with sharp edges of furniture parts during assembly.
- Attach the levelling foot before commissioning to avoid scratches on the floor.
- When used as sales or display shelving, the specific safety requirements must be observed.
