Safety Instructions:

- Stable bench construction, observe maximum load.
- Ensure that all parts are securely locked during assembly. Incorrect assembly can lead to instability. Assembly should be carried out in accordance with the instructions.
- Only use the bench in accordance with the intended specifications. Do not exceed the recommended weight limit.
- The changing bench is designed for use in damp rooms. Slipping may occur in wet conditions; precautionary measures required.
- Use height-adjustable feet/glides for stability. Check regularly for stability and functionality.
- Take suitable safety precautions for use in public facilities to avoid overloading and resulting accidents.
- Ensure that the bench is positioned and mounted on a stable and level surface to prevent it from tipping or slipping.
- Regularly check the stability of the legs and glides to prevent tipping.
- Discontinue use if damage occurs to the material.
- Caution: The bench is not suitable for use by children without supervision. Avoid children climbing or jumping.
- Regular inspection for damage and wear, especially in damp environments, is recommended.
- Beware of sharp edges when assembling, risk of injury from steel tubes.
- Covered corners and edges recommended to prevent injuries.
- The bench is optimised for use in damp environments, but should not be exposed to extreme weather conditions.
