Safety Instructions:

- All products must fulfil the material and structural requirements in order to prevent damage.
- Packaging and labelling must contain clear instructions for safe use and installation.
- Products must not contain any small parts that could pose a choking risk, especially important when used in the vicinity of children.
- Always keep products away from children to avoid the risk of choking on small parts.
- Take care when installing and using the product to avoid injuries caused by improper handling.
- Ensure that the parts are securely fastened to prevent injuries.
- Observe the maximum load capacity of the cabinet to prevent it from tipping over.
- Suitable tools are required for assembly and ensure that no loose parts are left behind.
- Safety instructions for safe use must be included.
- Provide recall information clearly and comprehensibly.
- Inform consumers about security problems found and set up accessible communication channels.
