Safety Instructions:

- Make sure that the steel cabinet is stable and placed on a stable, level surface to prevent it from tipping over.
- Only use the product in accordance with the intended conditions of use.
- Keep the cabinet away from flammable materials.
- Do not overload; the maximum weight should not be exceeded in order to avoid structural damage.
- Lock the closing doors securely before use to prevent unintentional opening.
- For commercial users, the product is only suitable for safety-conscious applications.
- Product is heavy. Suitable lifting aids or support are required during handling to prevent injuries.
- Make sure that the cabinet is carefully locked when in use to prevent accidental opening.
- Suitable means of transport must be used to transport the cabinet, as it weighs over 192 kg.
- The product is 'non-combustible' in accordance with DIN 4102-1 building material class A2 and offers certain fire protection measures, but care should still be taken when handling fire.
