Safety Instructions:

- Shelves with a height/depth ratio $\geq 5:1$ must be secured against tipping (wall or floor anchoring).
- When using the shelf, ensure that the maximum load capacity is not exceeded: up to 400 mm deep 100 kg, from 500 mm deep 120 kg, with beams up to 200 kg.
- Do not exceed the load capacity to avoid the risk of tipping over.
- Secure the ends of the shelf to ensure stability.
- The instructions must be followed exactly during installation to ensure safe use.
- The maximum shelf load and bay load must be observed in order to avoid overloading.
