Safety Instructions:

- Shelves with a height/depth ratio $\geq 5 : 1$ must be secured against tipping (wall or floor anchoring).
- Do not exceed the load capacity per shelf: 100 kg up to 400 mm deep, 120 kg from 500 mm deep, with joists up to 200 kg.
- Load capacity per bay: maximum 1000 kg.
- Make sure to use the shelves with the doors provided to increase stability.
- Excessive loading of the rack can lead to structural failure.
- Shelves should be mounted and secured on a stable, level surface.
