Safety Instructions:

- Shelves with a height/depth ratio $\geq 5:1$ must be secured against tipping (wall or floor anchoring).
- Avoid overloading the shelves beyond the specified load capacity.
- Do not exceed the maximum shelf load of 100 kg per shelf.
- Note maximum shelf load: up to 400 mm deep: 100 kg; from 500 mm deep: 120 kg; with beams: up to 200 kg.
- The load capacity of 1000 kg per shelf bay must not be exceeded.
- Note height adjustability in 59 mm increments to ensure the stability of the shelf.
- Only use suitable and even floor surfaces for stability.
- Make sure that heavy objects are stored on the lower shelves.
- Observe the maximum shelf load and bay load of the shelving unit.
