Safety Instructions:

- Make sure that the shelf is stably mounted and stands on a stable, level surface to prevent it from tipping over.
- Only use approved and compatible accessories and suitable tools to carry out the installation safely.
- Ensure that the maximum load capacity is not exceeded and that the shelves are not overloaded to minimise instability or breakage.
- Keep the shelf away from sources of heat and moisture to prevent material damage.
- Use the product in accordance with its intended use and the manufacturer's instructions.
- Secure the shelving structure to ensure stability and protect against tipping over in the event of improper assembly.
- Keep sensitive objects away from the front edge of the shelf to avoid possible accidents.
- Read the installation instructions carefully before starting the installation and observe the safety instructions.
- Keep out of reach of children to avoid injury from falling parts.
- Installation should be carried out by at least two people in order to minimise risks.
