Safety Instructions:

- Ensure that all parts of the product are securely and stably fastened to avoid the risk of injury.
- Before using the product, a complete inspection for damage should be carried out.
- Provide clear instructions for safe installation and use of the product to prevent misuse.
- The product should be designed in such a way that it cannot tip over or become unstable, especially when heavily loaded.
- Avoid overloading the splint to prevent structural damage or instability.
- Ensure that the rail is securely fastened to the wall to prevent objects from falling.
- Ensure storage out of the reach of children to prevent the risk of injury from falling objects.
