Article Numbers: 134499, 134498, 134497, 134490, 134489, 134488

Safety Instructions:

- Only suitable for indoor use, do not use outdoors.
- Suitable for indoor use; do not use for outdoor applications to prevent material damage.
- Avoid direct moisture: The product should not be used in damp environments to prevent damage to the wood surface.
- Keep the bench away from damp or wet conditions to ensure the longevity of the wood material.
- Ensure secure installation to prevent tipping over.
- Check for stability: Before use, ensure that the installation is stable and the product is secure.
- Make sure that the bench is stable when in use to avoid the risk of it tipping over.
- Avoid sitting on the bench if it is not properly assembled and stabilised.
- Ensure that the bench is mounted on a stable surface.
- There is a risk of crushing during assembly; follow the assembly instructions carefully.
- Ensure that all parts are securely fastened to ensure stability.
- Ensure that all parts are securely mounted to avoid injury.
- Check the connections regularly to ensure that all parts are securely fastened.
- Include warnings on correct use and installation to minimise the risk of accidents.
- The manufacturer should provide clear instructions for the safe installation and use of the product.
- Risk of injury due to sharp edges on the frame or improper handling.
- Risk of falling, especially if the bench is incorrectly installed or overloaded.
- Protection against overloading: Do not exceed the maximum load of the product to avoid structural damage.
- Use suitable cleaning agents for cleaning to avoid damage.
- Regular maintenance required: The product should be checked regularly for wear and tear.
- Please do not make any changes to the construction or components of the bench in order not to jeopardise safety.
- The product should be checked for physical defects before use.
- The product is not suitable for children under 3 years of age as it may contain small parts.
- Not suitable for children: The product is not designed for use by children under 3 years of age as it does not contain any small parts.
- Risk of suffocation from loose parts if the bench is dismantled or incorrectly assembled.
- The application of the relevant European product safety standards is required.
- The seat height and seat depth are designed to meet ergonomic requirements; appropriate instructions must be provided for individual adjustments.
- Customer-specific requests regarding colours and sizes should be clearly communicated to avoid misunderstandings.
