Safety Instructions:

- Check that all doors close properly to avoid injury.
- Make sure that the glass surfaces are not treated with sharp objects to avoid injury from glass splinters.
- Ensure that heavy objects are placed securely on the shelves provided to prevent them from tipping over or falling.
- Keep the keys for the lockable doors in a safe place to prevent unauthorised access.
- Only use the combination cabinet for its intended purpose to ensure the safety and durability of the product.
- The cabinet is not suitable for use by children; there is a risk of suffocation if small parts are removed.
- Hinges and edges can cause injuries; be careful when opening the doors.
- Observe the maximum load on shelves to prevent them from tipping over or breaking.
- Safety glass can break in the event of a strong impact; take care when transporting and setting up.
- Stability problems may occur if the cabinet is used on an uneven surface.
- Make sure that the floor levelling screws are correctly adjusted to avoid the risk of tipping.
- Additional safety warnings for users: Use the product in accordance with the instructions for safe installation.
- Cabinet can tip over due to unstable positioning.
- Keep the cabinet on a stable surface to avoid the risk of falling.
- The use of a lock is recommended to prevent unauthorised access.
- Glass products can cause injury, so be aware of the risk of breakage when handling them.
- Caution: The safety glass doors are fragile. Avoid a strong impact.
