Safety Instructions:

- Safety containers may only be used for their intended purpose, in particular for the disposal of solvent-based and flammable liquids of GHS categories 1-4.
- Before use, ensure that the container is properly closed to avoid hazardous vapours.
- Containers should be placed in a well-ventilated location; integrated ventilation openings and base edge openings must not be blocked to avoid a self-igniting environment.
- It is recommended to check the container regularly for damage or defects, including the self-closing mechanisms, to ensure functionality and safety.
- Protective clothing, including gloves and eye protection, should be worn when filling or emptying hazardous substances.
- Manufacturers must provide clear instructions for use and warnings in the respective national language.
- Flammable liquids require special care; only use the container in suitable environments without naked flames or sources of ignition.
- Do not overfill and do not mix chemicals to avoid the risk of fire; the container must be stable and secure.
- After emptying, ensure that the container is completely empty and handle safely to avoid the risk of explosion.
- Safety containers and escaping vapours can be hazardous to health and safety if handled incorrectly.
- Containers may only be used by trained personnel; in the event of accidents, the authorities must be informed immediately.
