Article Numbers: 134655, 134654

Safety Instructions:

- Only store flammable liquids in tightly closed containers.
- Risk of fire or explosion if handled incorrectly.
- Technical forced ventilation must be maintained regularly to ensure optimum air exchange rates.
- Dispose of hazardous substances only in accordance with local regulations.
- Damage to the insulation can result in a hazard due to environmental influences.
- Wear gloves and safety goggles when handling hazardous substances.
- Behaviour in case of fire: Emergency exits and fire extinguishers must be kept known.
- Observe safety precautions when handling water-polluting and flammable liquids.
- The containers may only be opened, filled or emptied in compliance with the safety regulations.
- Use the safety lock and panic button in accordance with the applicable regulations.
- Before using the container, carry out a visual inspection for damage or defects.
- Put on appropriate personal protective equipment (PPE) if necessary.
- Do not exceed the maximum permissible load of 1000 kg/sqm.
- Regularly check the area around the container for possible hazards.
