Safety Instructions:

- Use products safely and as intended to minimise risks.
- Observe the maximum load of 50 kg per shelf.
- Only use for portable loads up to a maximum of 100 kg.
- Ensure protection against mechanical hazards, especially when filling the cabinets.
- Ensure that the shelves are stable and do not wobble.
- Ensure that the shelves are correctly installed in the material cabinet.
- Improper handling can cause heavy objects to fall.
- Keep the operating instructions in a safe place and consult them if necessary.
- Keep out of the reach of children to avoid possible injury.
- Wear suitable personal protective equipment during installation.
- Ensure that the permissible load capacity of 100 kg is not exceeded.
- Avoid injuries due to improper handling of the additional shelves.
- Keep the weight distribution even during assembly and application.
- Only use the shelves in material cabinets intended for this purpose in order to avoid stability risks.
- During assembly, ensure that the shelves are securely attached to prevent them from tipping over or falling down.
- Suitable for use in dry and well-ventilated areas.
- Avoid using excessive force or improper methods when inserting or removing objects on the floors.
