Please note the technical data of the products!

Article Numbers: 193760, 193755

Safety Instructions:

- The safe should be firmly anchored to the floor to prevent unauthorised removal (anchoring material included).
- Keep the safe closed and the electronic lock in a secure state to prevent unauthorised access.
- Do not use the safe for storing flammable materials or hazardous chemicals.
- Ensure that the operating instructions are provided in a language that all users can understand.
- Check regularly that the lock is working properly and that there are no signs of damage.
- Protect the safe from extreme temperatures or moisture to protect the electronic components.
- Only accessible to adults and safe to use.
- The product is heavy - be careful when transporting it to avoid injury.
- Improper use can cause the lock to fail - always ensure that it is closed correctly.
- Protect the products from water and moisture so as not to jeopardise their functionality.
- In the event of a burglary - inform the insurance company about the safe and check the insurance cover.
