Manufacturer/Responsible Person: Phoenix Safe Deutschland GmbH, Bahnstr. 23, 42327 Wuppertal, Deutschland

E-Mail: info@phoenixsafe.de

Please note the technical data of the products!

Article Numbers: 193717, 193713

Safety Instructions:

- Fire hazard: Do not use the safe in the direct vicinity of open flames or other heat sources and keep it away from heat-sensitive materials to minimise the risk of fire.
- Choking hazard: Keep the safe out of the reach of small children.
- Theft risk: The safe should be installed in a secure area to minimise the risk of it being broken into.
- Accessibility: The electrical mechanism may not work if the batteries are low or if there is a power cut. Always have spare batteries to hand.
- User safety: Follow the instructions for safe use of the electronic lock.
- Weight: When installing the safe, attention should be paid to the load-bearing capacity of the surface. Follow all safety precautions during transport as the product is heavy (106 kg).
- Ensure that the safe is properly locked to prevent unauthorised access.
- Avoid extreme temperatures and humidity so as not to impair the functionality of the fire protection.
- Make sure that the safe is regularly maintained and checked to ensure security.
- Do not store any flammable materials in the safe.
