Safety Instructions:

- Do not insure over € 2500 for burglary protection without suitable security measures.
- Store safely to avoid fire hazards. Do not store flammable materials near the cabinet.
- Follow the instructions for using the fingerprint lock carefully and only use the electronic lock in accordance with the manufacturer's instructions.
- Ensure that the appliance is working properly before use. Regularly check the visual aids and other components of the cabinet for wear or possible damage.
- Do not exceed the temperature limits in extreme heat to avoid damage. Keep the cabinet dry and avoid direct moisture to prevent damage to the electronic equipment.
- Do not attempt to repair the appliance yourself if it is faulty. In the event of faults, contact the manufacturer or specialised personnel immediately.
- Ensure that the cabinet is set up in a stable and level location and assembled correctly to prevent it from tipping over.
- Ensure that the panic lock works properly to guarantee safety in the event of unforeseen events.
- Inform users about the maximum weight load of the shelves/drawers.
- Provide clear instructions on how to use the cabinet safely, especially in relation to child safety.
- Only use the cabinet for the intended materials and documents and keep it closed when not in use to prevent unauthorised access.
- Further information on safe use can be found in the operating instructions.
