### Safety Instructions:

- Observe maximum load: 110 kg, do not exceed to avoid stability problems.
- Adjust the seat height only within the intended range (410 - 470 mm) and using the intended mechanism.
- Use stepless seat height adjustment with properly installed safety gas spring. Ensure that the function is checked regularly.
- Only use universal castors on suitable, non-slip floors, not on uneven or slippery floors.
- Do not manipulate the rotating function improperly. Handle the rotating mechanism safely to avoid injury.
- Check that the armrests are correctly seated to avoid the risk of choking on small parts.
- Do not use immediately if the fabric coating or rollers are damaged. Carry out regular inspections for damage.
- Make sure that the floor on which the chair is used is stable and non-slip to avoid the risk of tipping and slipping.
- Carefully read and follow the safety instructions and instructions for use. Seek special medical advice if you have back problems.
- Keep out of the reach of children to avoid the risk of injury from falling. Not suitable for children under 14 years of age.
- Check that all components are correctly fitted before use. In the event of malfunctions, stop using the appliance immediately.
