Safety Instructions:

- The drip tray is intended for storing liquids. Act immediately in the event of any leakage or spillage of liquids.
- The drip tray may only be operated with the intended oil and chemical-resistant drums.
- Safe storage: For heavy weights (max. 760 kg), ensure that the tray is placed on a stable and level surface.
- Do not overload: The maximum permissible load of 760 kg must not be exceeded.
- Caution during transport: For internal transport, the tray must be emptied to prevent it from tipping over.
- Avoid contact with sharp objects to prevent damage.
- The drip tray is not suitable for storing explosive or flammable materials.
- The drip tray must not be used in areas where aggressive chemicals are stored or transported unless they are suitable for such substances.
- The drip tray must be monitored during use to ensure that it is functioning properly.
- Keep the drip tray clean and free of residue to prevent accidents caused by slipping.
- Only use the drip tray for the supported drums (200 litres) so as not to exceed the maximum load capacity.
- Always hold the barrels above the grating to avoid injury.
