Safety Instructions:

- Fire protection for documents and paper documents for up to 90 minutes. Separately mediated data protection inserts are required to protect data carriers.
- Water-resistant seals prevent water damage from sprinkler systems and extinguishing water, but are not watertight when fully submerged and are not designed for permanent contact with water.
- Fall safety tested from a height of 9.15 metres.
- Fingerprint lock provides access for up to 128 registered users.
- Electronic key lock requires user code and has additional security functions.
- Product weight of 266 kg requires special care during transport and installation.
- Key and side locks provide additional security against unauthorised access.
- Designed for use in the office, but heavy and stable for transport or installation on upper floors.
- Safety information and instructions for use must be provided in understandable language.
