Safety Instructions:

- Observe the maximum load of 50 kg per shelf/shelf to avoid overloading and the associated risks.
- Use a security cylinder lock to prevent unauthorised access. Keep keys in a safe place.
- Secure the cupboard to stable walls and, in the case of smooth shelves, take additional stability measures to prevent tipping.
- Before installation, check for sharp edges and ensure that all fastenings are properly tightened to minimise the risk of injury.
- Ensure use in environmentally friendly areas in accordance with the safety guidelines. Avoid use in humid environments to prevent rust formation and material damage.
- Follow the instructions carefully during assembly to ensure that the product has been assembled correctly.
- Prevent children from playing or hiding in the cupboard to minimise the risk of suffocation.
- Avoid smoking or naked flames in the vicinity of the cabinet to reduce the risk of fire.
- The cabinet should only be used for its intended purpose.
- Use sound-absorbing rubber buffers on the doors and take measures to prevent the risk of crushing or injury when opening.
- Before use, ensure that no sharp objects or chemicals are stored in the cabinet if it is not suitable for this purpose.
- If used incorrectly, the doors may be damaged by the weight of the contents; check stability before opening.
- Secure installation and anchoring to prevent tipping or wobbling during use.
- Observe disposal instructions in accordance with local regulations.
