Safety Instructions:

- Ensure that the cabinet is placed on a stable and level surface to prevent it from tipping over.
- Use the security cylinder lock to prevent unauthorised access and to secure the cabinet when not in use.
- The maximum load of 50 kg per shelf must not be exceeded in order to avoid overloading and instability.
- Keep the cabinet away from moisture and direct heat sources to avoid corrosion and the risk of electric shock.
- Follow the installation instructions carefully and pay attention to safety of use.
- Not suitable for children; supervise children to avoid the risk of suffocation and accidents.
- Keep the hinged doors closed during use and secure them to prevent injury.
- Make sure to distribute heavy objects evenly to ensure the stability of the cupboard.
- Do not allow any liquids to penetrate the cabinet to prevent rust formation.
- Regularly check the function and condition of the safety cylinder lock.
- If the cupboard is moved, empty it completely first.
